

Mold Information and Prevention Addendum

Please note: It is our goal to maintain a quality living environment for our residents. To help achieve this goal, it is important to work together to minimize any mold growth in your dwelling. That is why this addendum contains important information for you, and responsibilities for both you and us.

		January 1, 2010
_		Date of Lease Contract
	Resident or Residents (All residents must sign here)	Owner or Owner's Representative (Signs here)
	pour perpetically open windows and doors on days when the outdoor weather is dry (i.e., humidity is below 50 percent) to help humid areas of your dwelling dry out. Promptly polity us in writing about any signs of water leaks, water infiltration or mold. We will respond in accordance with state law and the Lease Contract to repair or remedy the situation, as necessary.	to mold growth. If you have questions regarding this addendum, please contact us at the management office or at the phone number shown in your Lease Contract. If you fail to comply with this Addendum, you can be held responsible for property damage to the dwelling and any health problems that may result. We can't fix problems in your dwelling unless we know about them.
	 and the bathroom floor (2) leave the bathroom door open until all moisture on the mirrors and bathroom walls and tile surfaces has dissipated and (3) hang up your towels and bath mats so they will completely dry out. Promptly nonly us in writing about any air conditioning or heating system problems you discover. Follow our rules, if any, regarding replacement of air filters. Also, it is recommended that you periodically open windows and doors on days when the 	 areas of visible mold on non-porous surfaces. Instead, notify us in writing, and we will take appropriate action in compliance with Section 92.051 et seq of the Texas Property Code, subject to the special exceptions for natural disasters. 7. COMPLIANCE. Complying with this addendum will help prevent mold growth in your dwelling, and both you and we will be able to respond correctly if problems develop that could lead
	ceilings, floors and other surfaces as soon as reasonably possible. Look for leaks in washing machine hoses and discharge lines—especially if the leak is large enough for water to infiltrate nearby walls. Turn on any exhaust facts in the bathroom and kitchen before you start showering or cooking with open pots. When showering be sure to keep the shower curtain inside the tub or fully close the shower doors. Also, the experts recommend that after taking a shower or bath, you: (1) wipe moisture off of shower walls, shower doors, the bathtub	not yet visible to the naked eye. A vacuum cleaner with a high-efficiency particulate air (HEPA) filter can be used to help remove non-visible mold products from <i>porous</i> items, such as fibers in sofas, chairs, drapes and carpetsprovided the fibers are completely dry. Machine washing or dry cleaning will remove mold from clothes. 6. DO NOT CLEAN OR APPLY BIOCIDES TO: (1) visible mole on <i>porous surfaces</i> , such as sheetrock walls or ceilings, or (2) <i>large</i>
	mold or food for mold. Immediately throw away moldy food. Remove visible moisture accumulation on windows, walls,	Always clean and apply a biocide to an area 5 or 6 times larger than any visible mold because mold may be adjacent in quantities
	Keep your dwelling cleanparticularly the kitchen, the bathroom(s), carpets and floors. Regular vacuuming, mopping and using a household cleaner to clean hard surfaces is important to remove the household div and debris that happer.	cleaners will actually kill mold). Tilex® and Clorox® contain bleach which can discolor or stain. Be sure to follow the instructions on the container. Applying biocides without first cleaning away the dirt and oils from the surface is like painting over old paint without first cleaning and preparing the surface.
3.	PREVENTING MOLD BEGINS WITH 101. Ha preder to minimize the potential for mold growth in your dwelling, you must do the following:	then within 24 hours apply a pre-mixed, spray-on-type household biocide, such as Lysol Disinfectant®, Pine-Sol Disinfectant® (original pine-scented), Tilex Mildew Remover® of Clorox Ceanup®. (Note: Only a few of the common household
	spread through the air and are commonly transported by shots clothing and other materials. When excess moisture is present inside a dwelling, mold can grow. There is conflicting schemic evidence as to what constitutes a sufficient accumulation of mold which could lead to adverse health effects. Whetheless, appropriate precautions need to be taken.	5. IF SMALL AREAS OF MOLD HAVE ALREADY OCCURRED ON NON-POROUS SURFACES (such as ceramic tile, formica vinyl flooring, metal, wood or plastic), the federal Environmental Protection Agency (EPA) recommends that you first clean the great with soap (or detergent) and water, let the surface dry, and
	struggling with large amounts of dead organic matter. Mold breaks down organic matter in the environment and uses the end product for its food. Mold spores (like plant poller)	of moisture into the air); and insufficient drying of carpets, carpet pads, shower walls and bathroom floors.
	environmentboth indoors and outdoors and in both new and old structures. Molds are naturally occurring microscopic organisms which reproduce by spores and have existed practically from the beginning of time. All of us have lived with mold spores all our lives. Without molds we would all be	washing machine hose leaks, plant watering overflows, per urine, cooking spills, beverage spills and steam from excessive open-pot cooking; leaks from clothes dryer discharge vants (which can put lots)
